PROJECT SAMPLE RUN SCREENSHOT/S WITH DESCRIPTIONS:

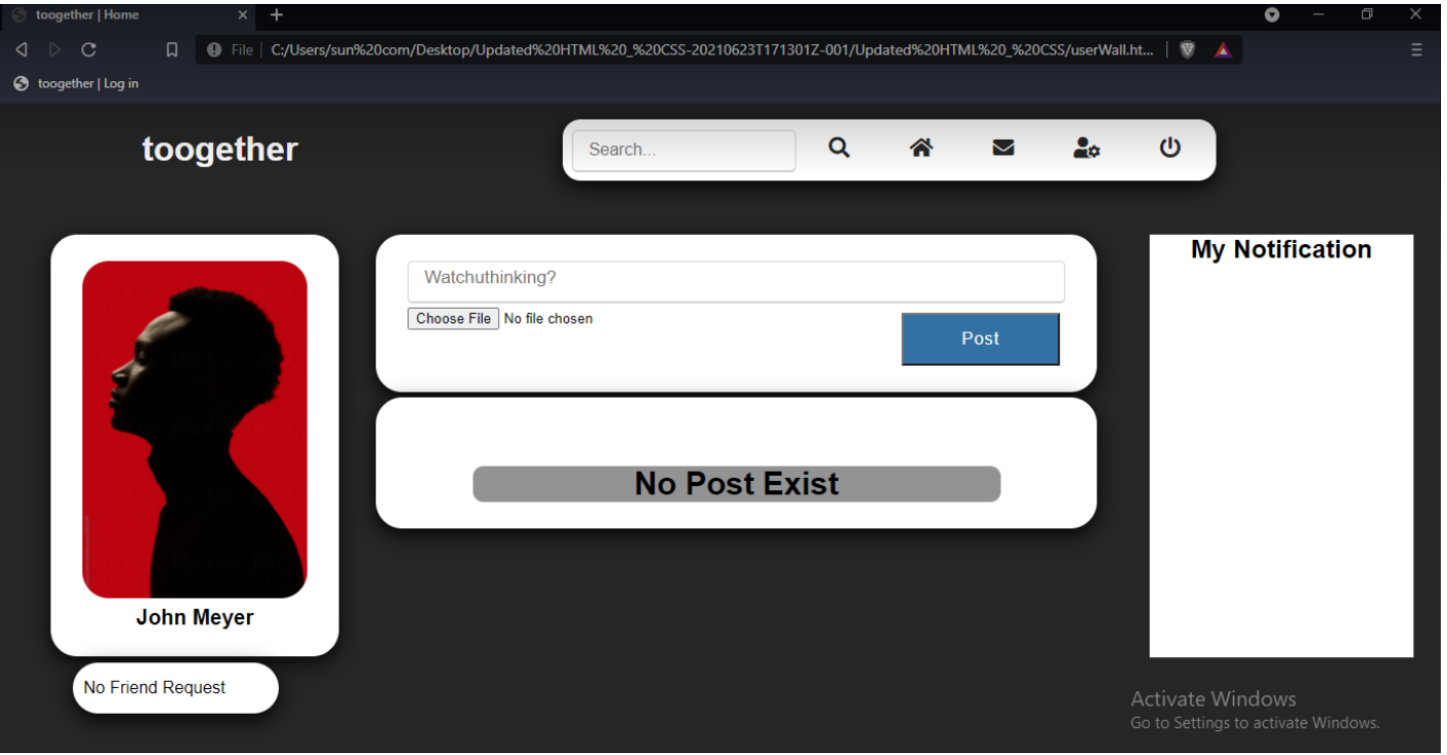

- The screen shot shows the front page of the *together* website. In this, the user needs to input his/her email and password to log in to his/her account. On the other hand, if the user does not have any account yet, he/she needs to click the Create New Account button.

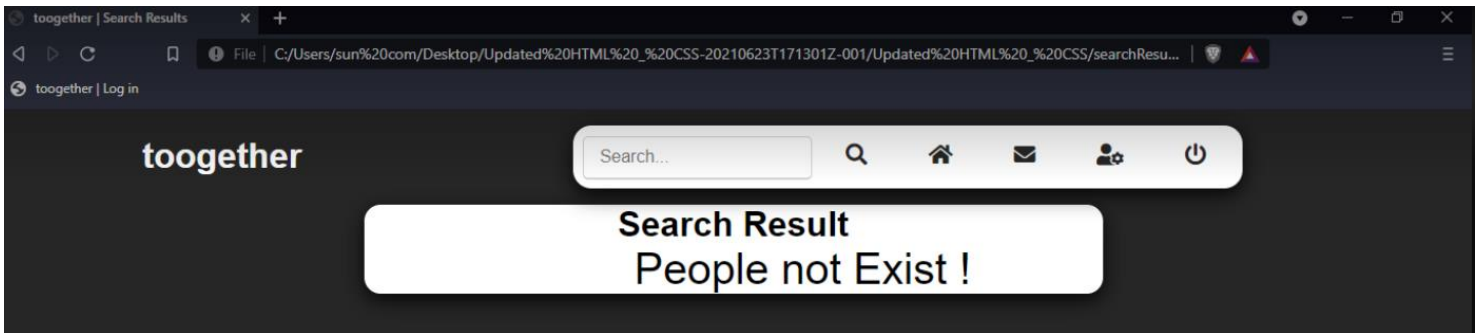

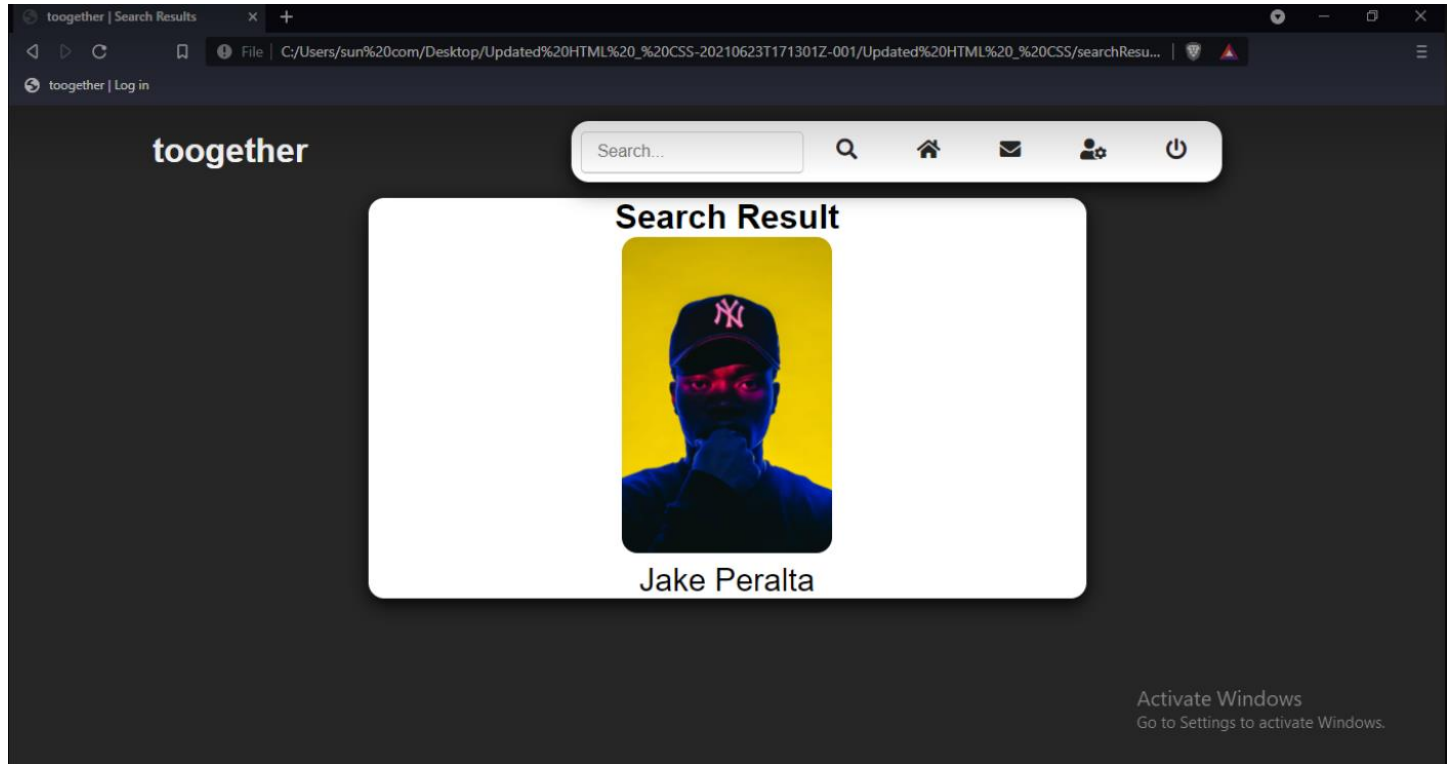

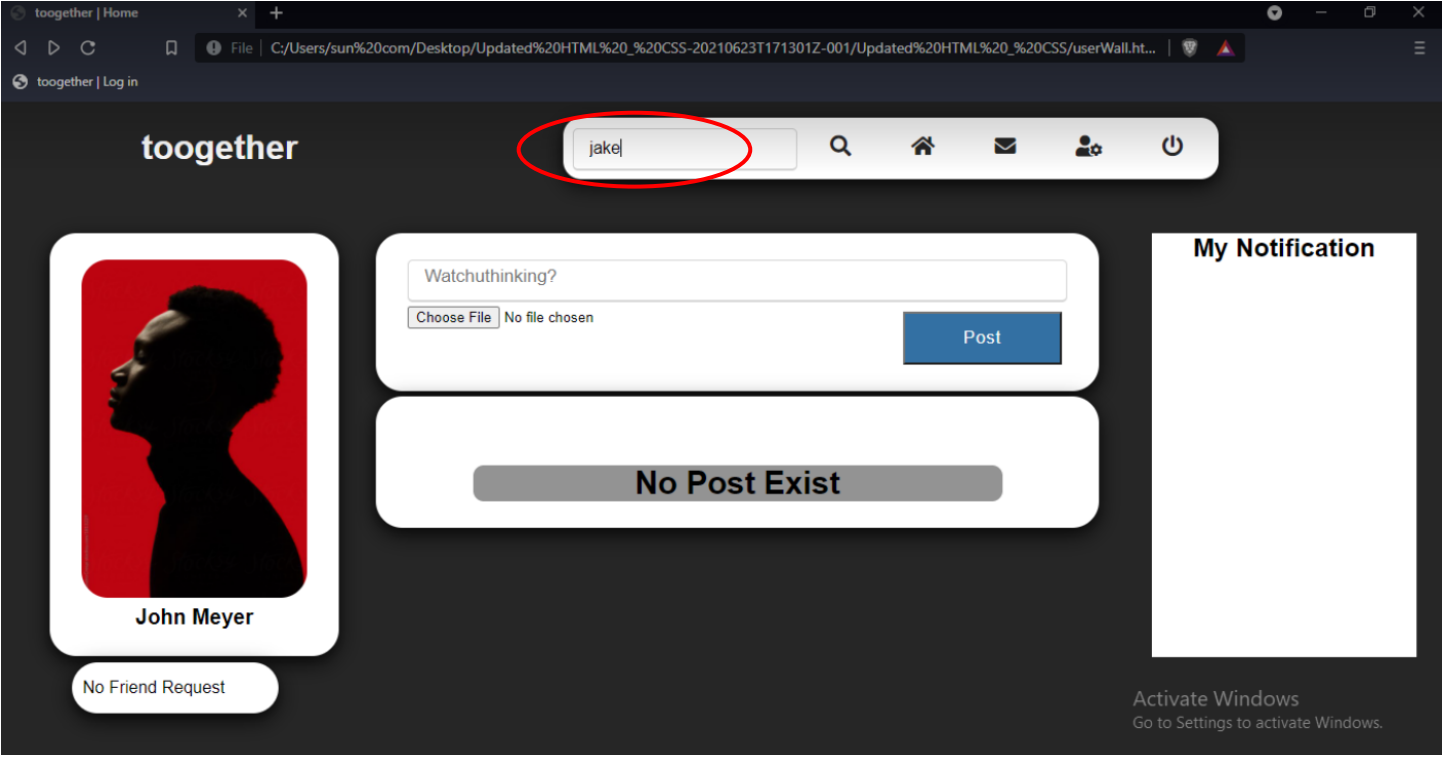

- Upon clicking the Create New Account button, user must need to input necessary information as shown on the given screen shot. After filling out, Submit button must be clicked.

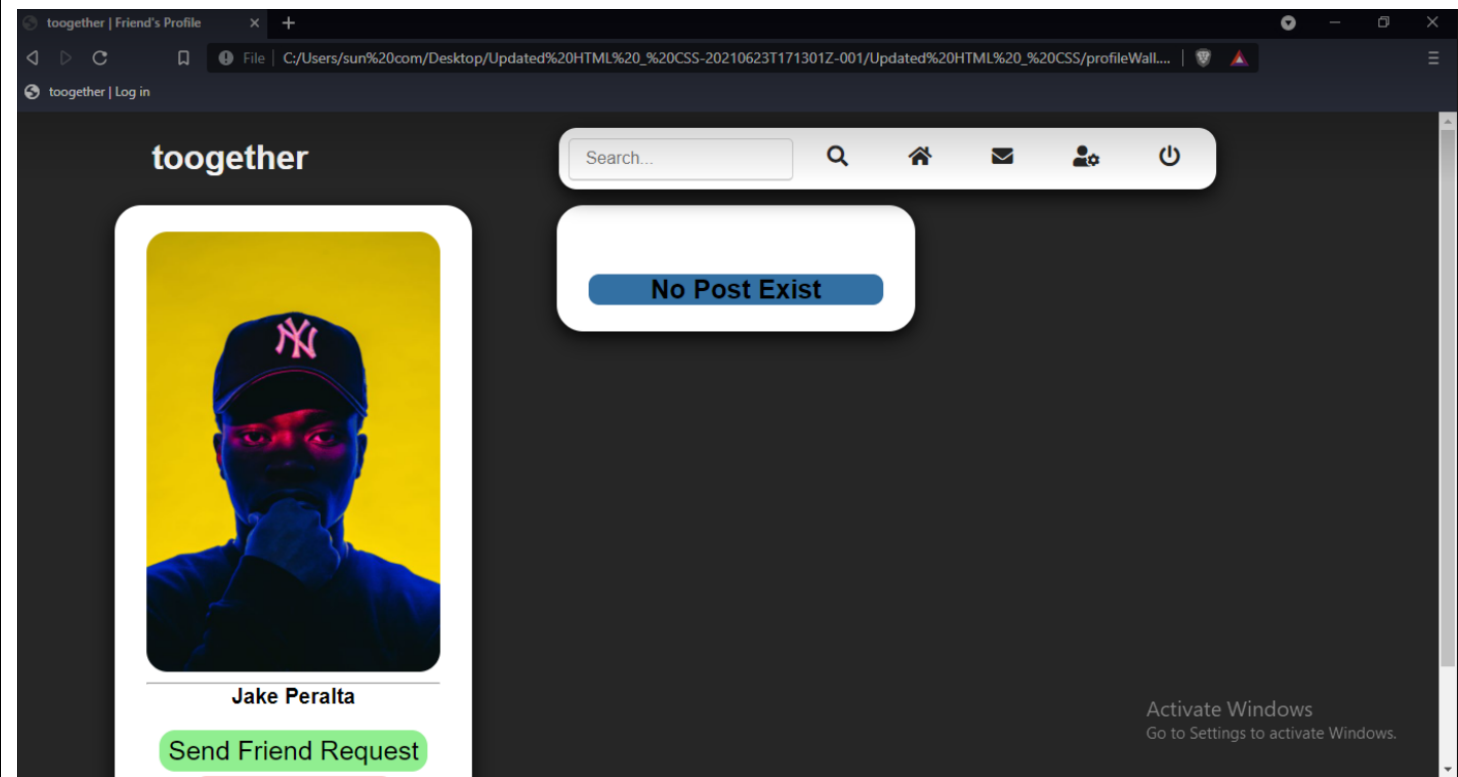

- Take note that user needs to fill out every necessary details for the creation of the account. If not, an alert will appear upon clicking the Submit button as seen on the screenshot above.

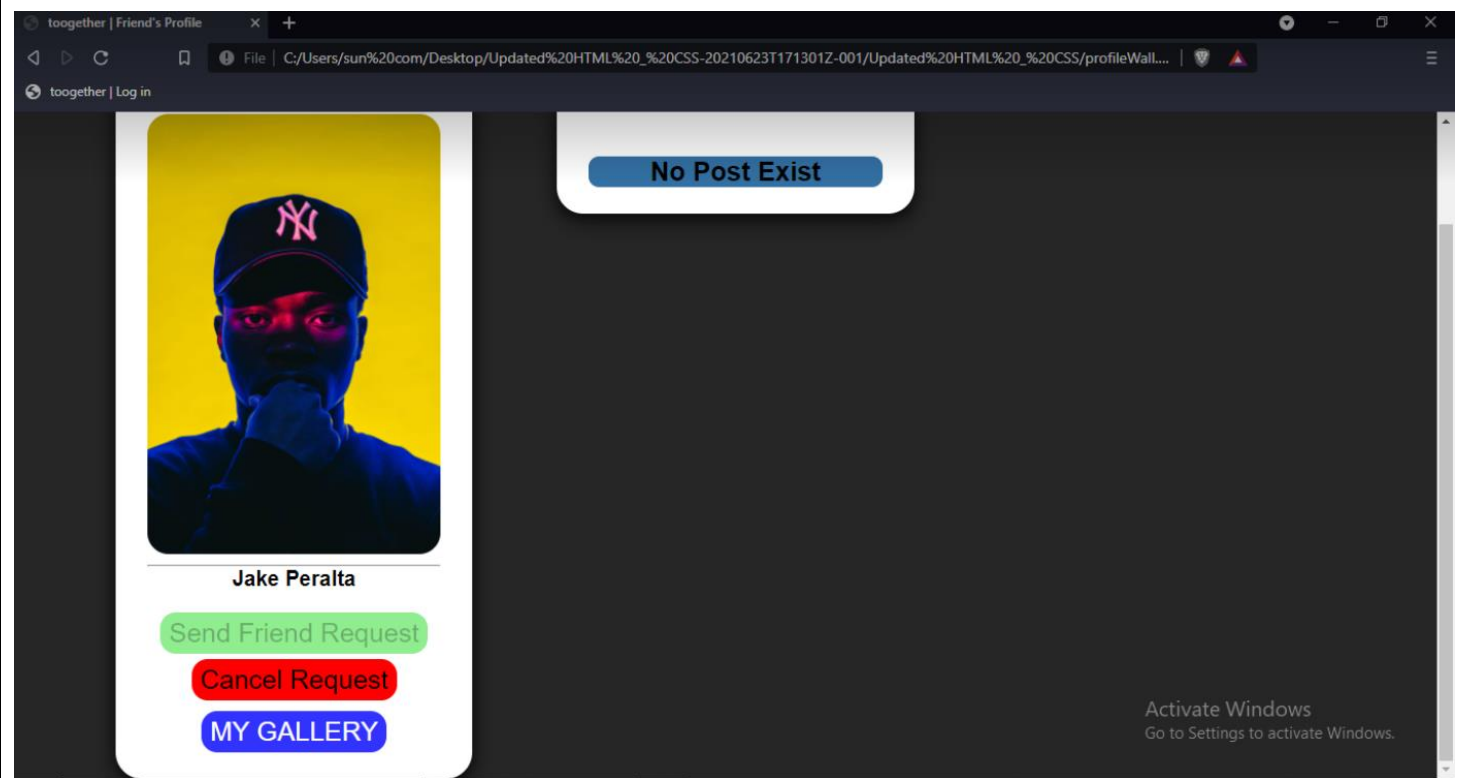

- After clicking the Submit button, the user's account will be created as shown in this screen shot.

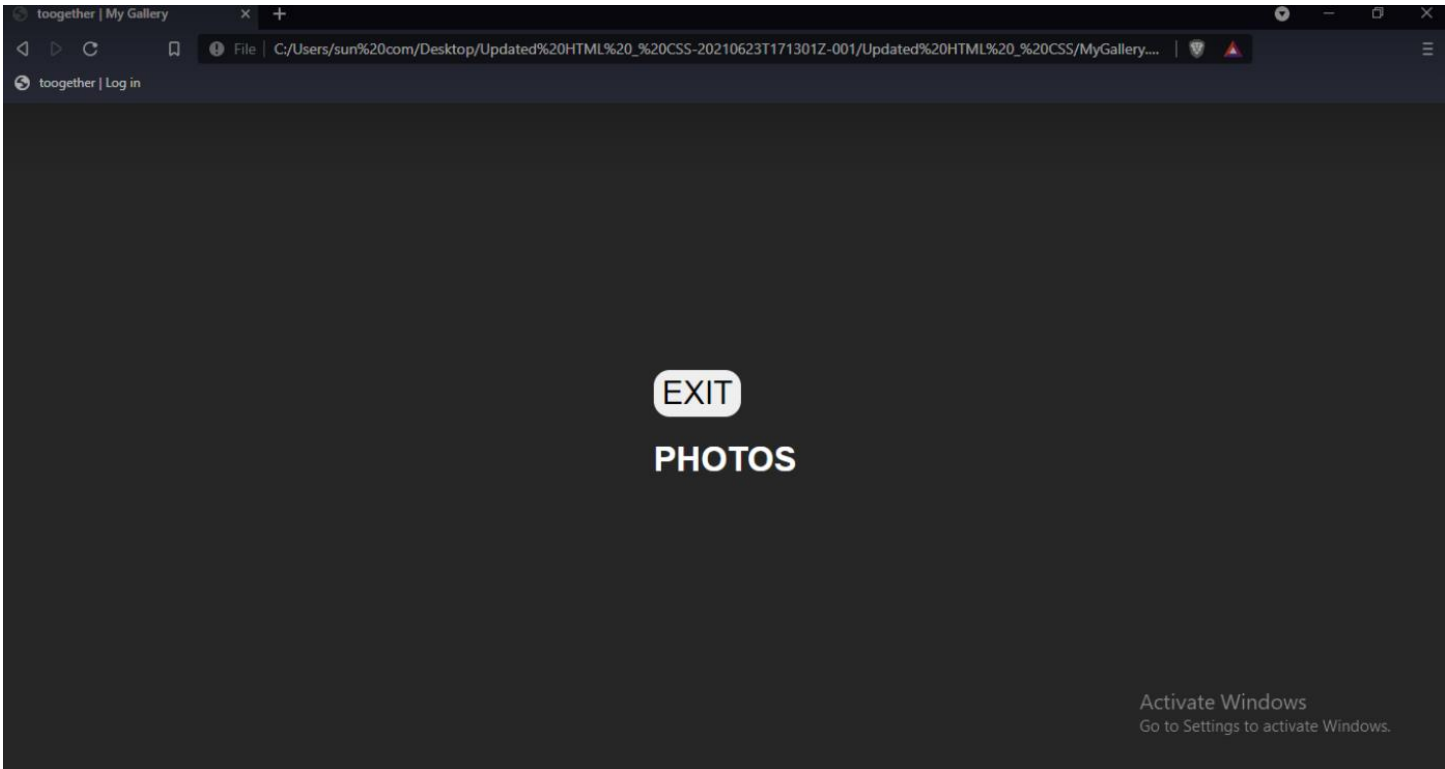

- The above screenshots shows that when the user search for another's account on the given field, if the user exists, it will appear on the search result, otherwise "People not Exist!" text will appear.

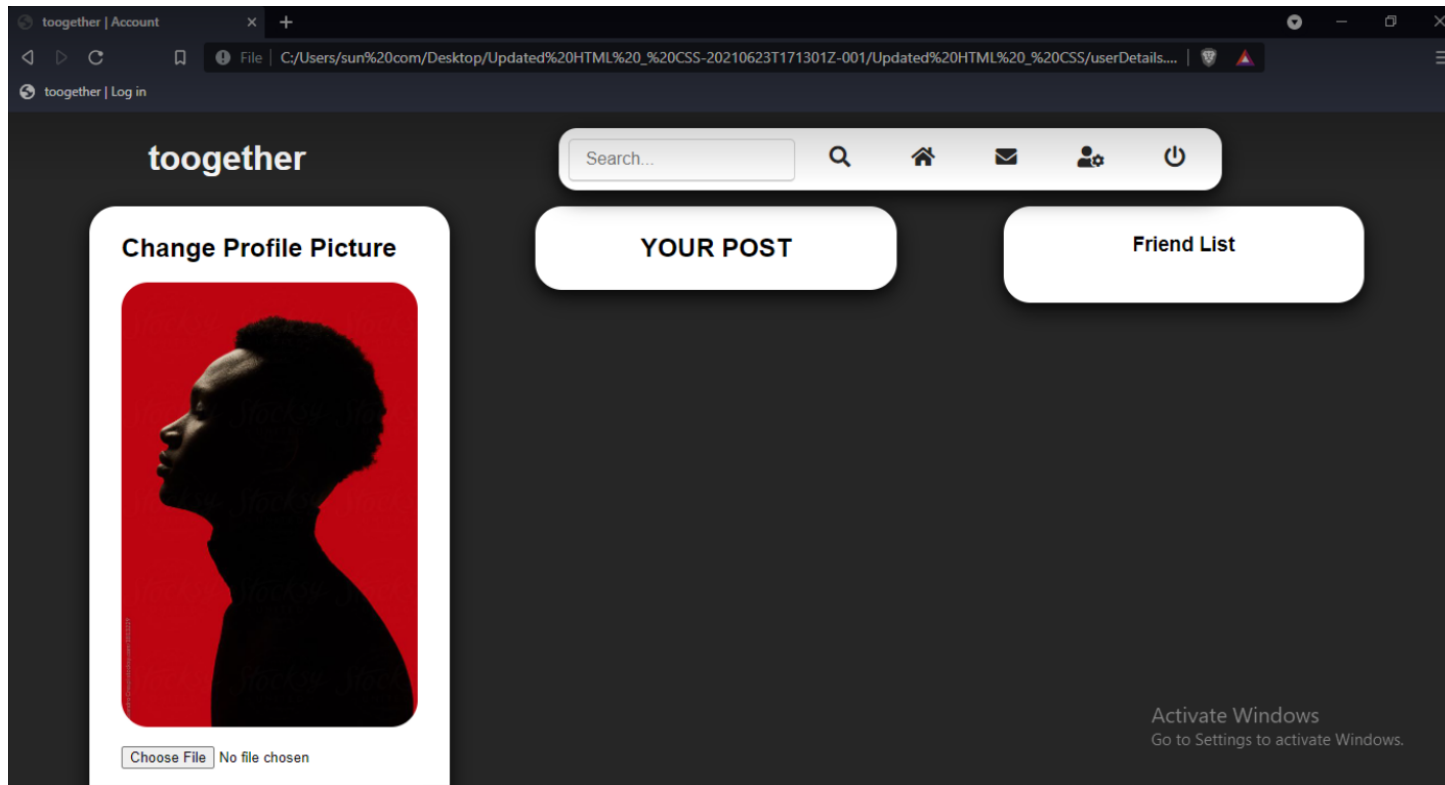

- When the user decided to click the profile of the person he/she searched, he/she will see his/her posts if there is any.

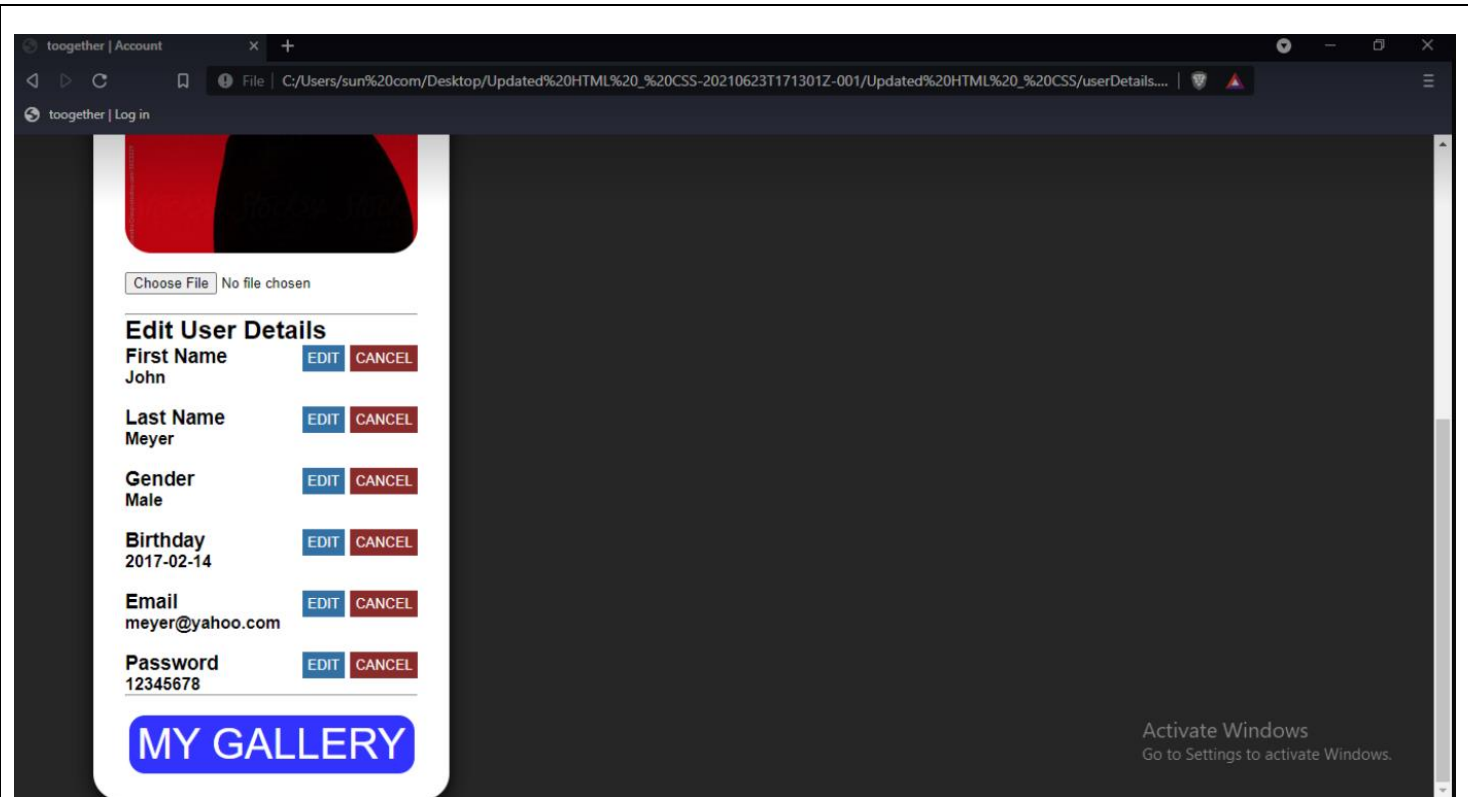

- Also, the user can send a friend request upon clicking the Send Friend Request button. Also, he can cancel it upon clicking the Cancel Request button.

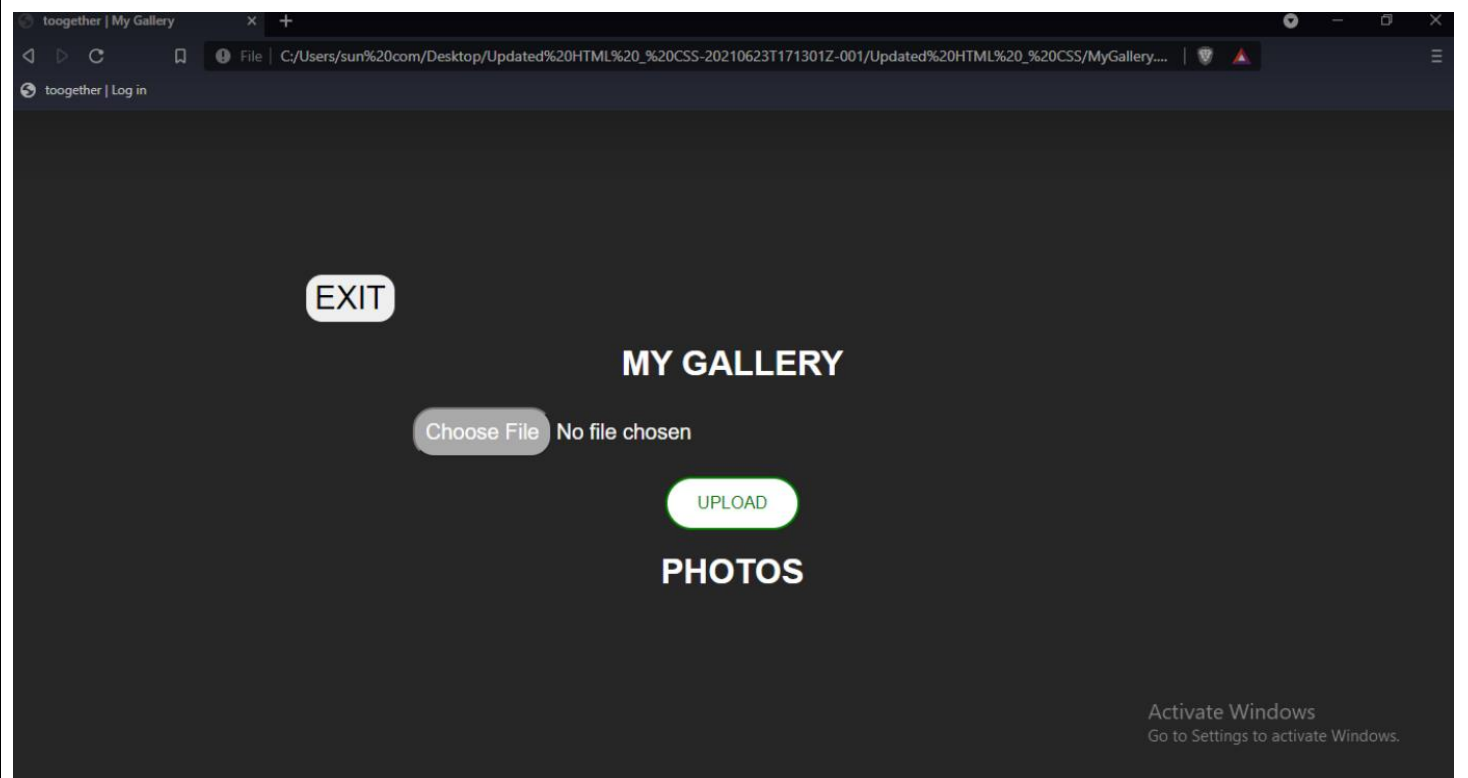

- This picture shows that when John Meyer (current user) clicks the My Gallery button of Jake Peralta, it shows nothing since Jake Peralta did not post anything yet.

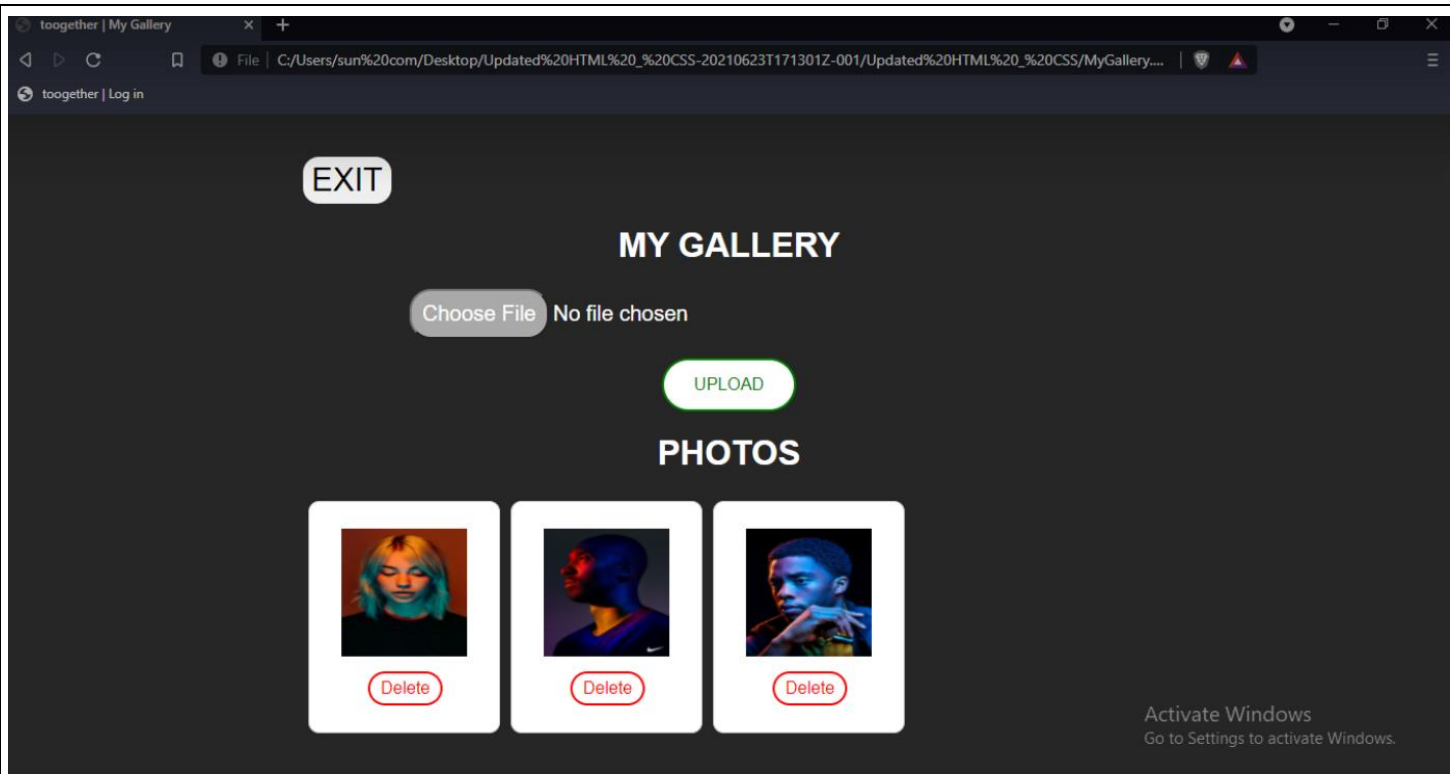

- When the current user clicks the account settings (the icon of the user with a cog from a machine), it will look like the above screen shot. The idea emphasizes the ability of the user to edit his account.

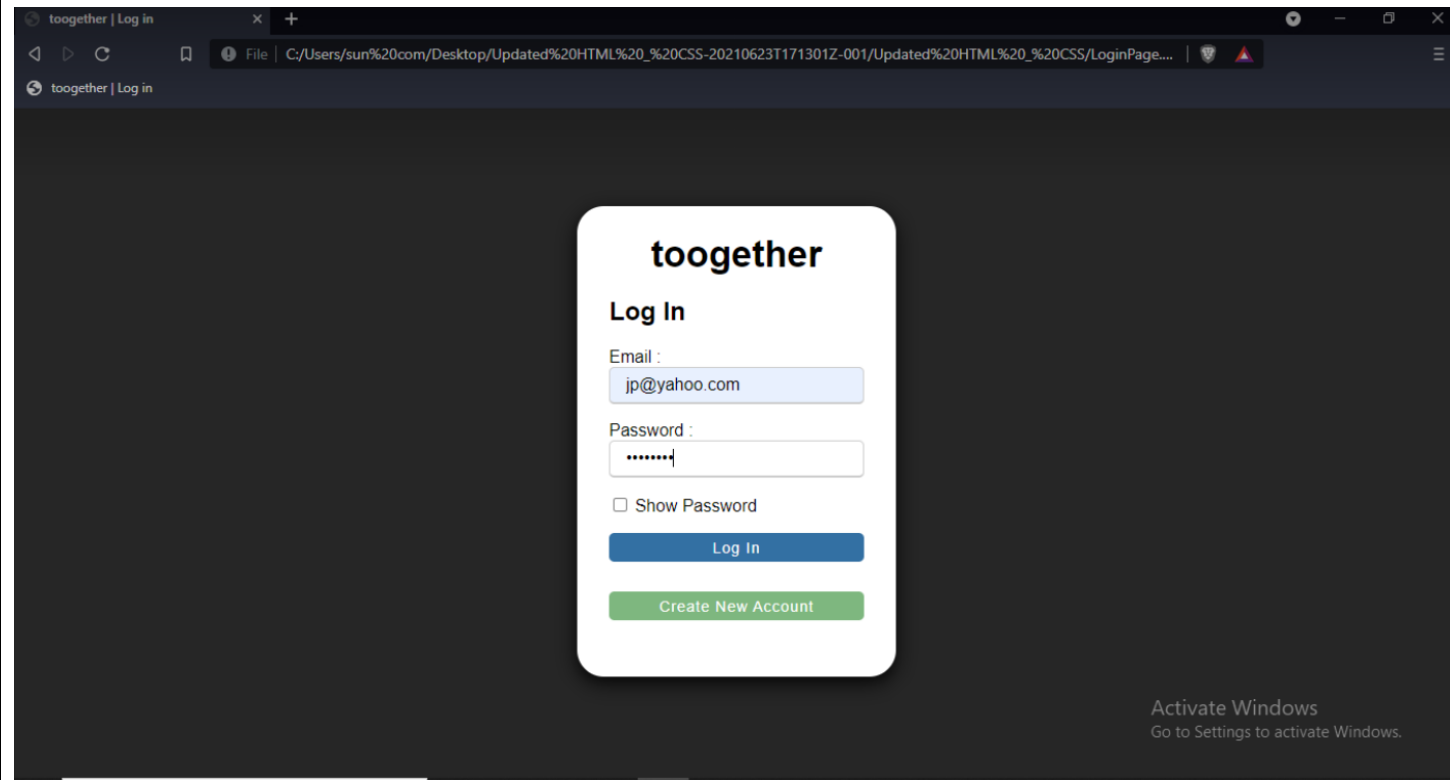

- As mentioned, the user can edit his account or cancel the editing.

- When the user clicks the My Gallery button, the above screenshot will appear. He can upload photos from his computer file upon clicking the Choose File button.

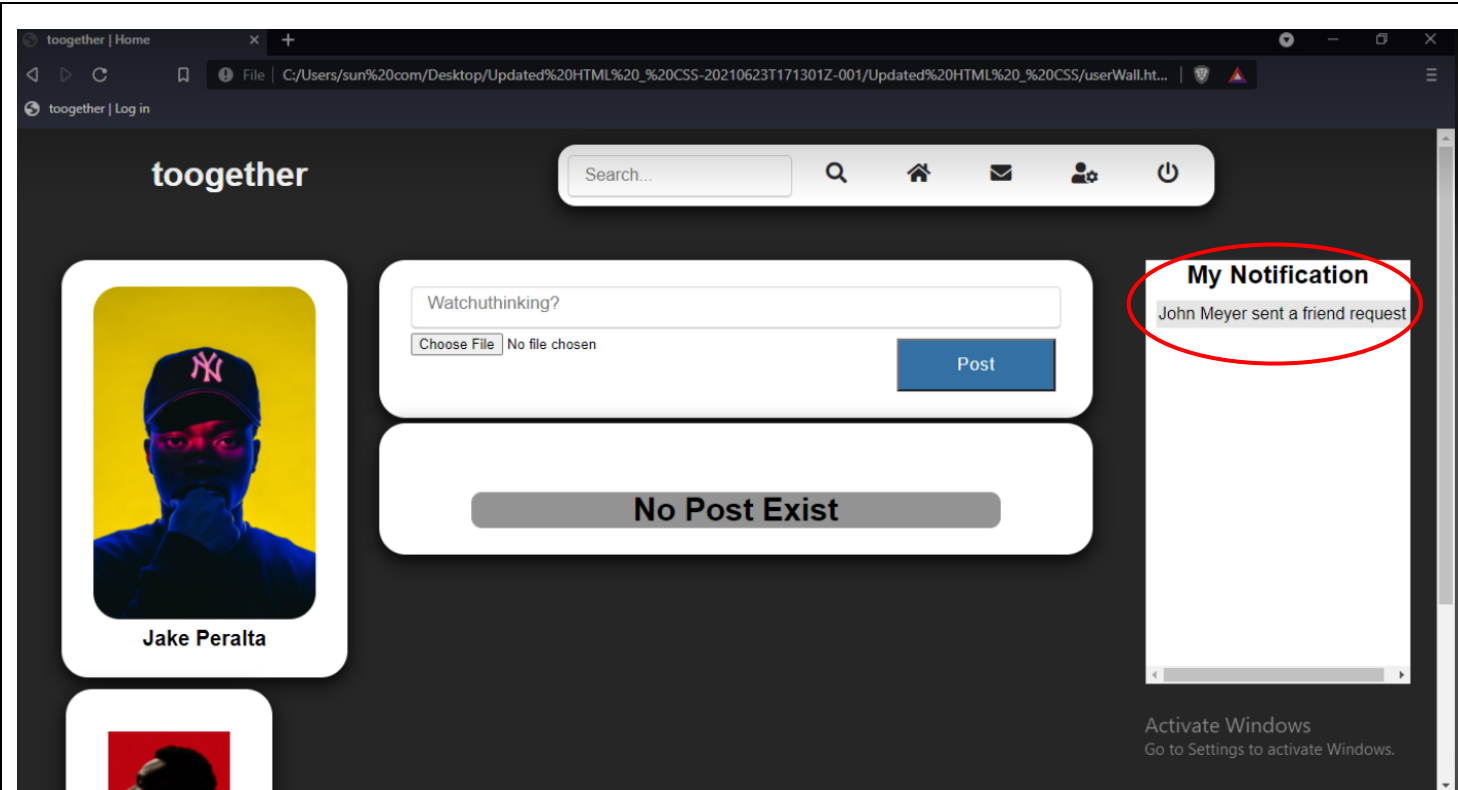

- Note that user can upload more than one picture simultaneously upon clicking the UPLOAD button. Also, he can remove picture by clicking the Delete button on each photo. In this way he can manage his gallery.

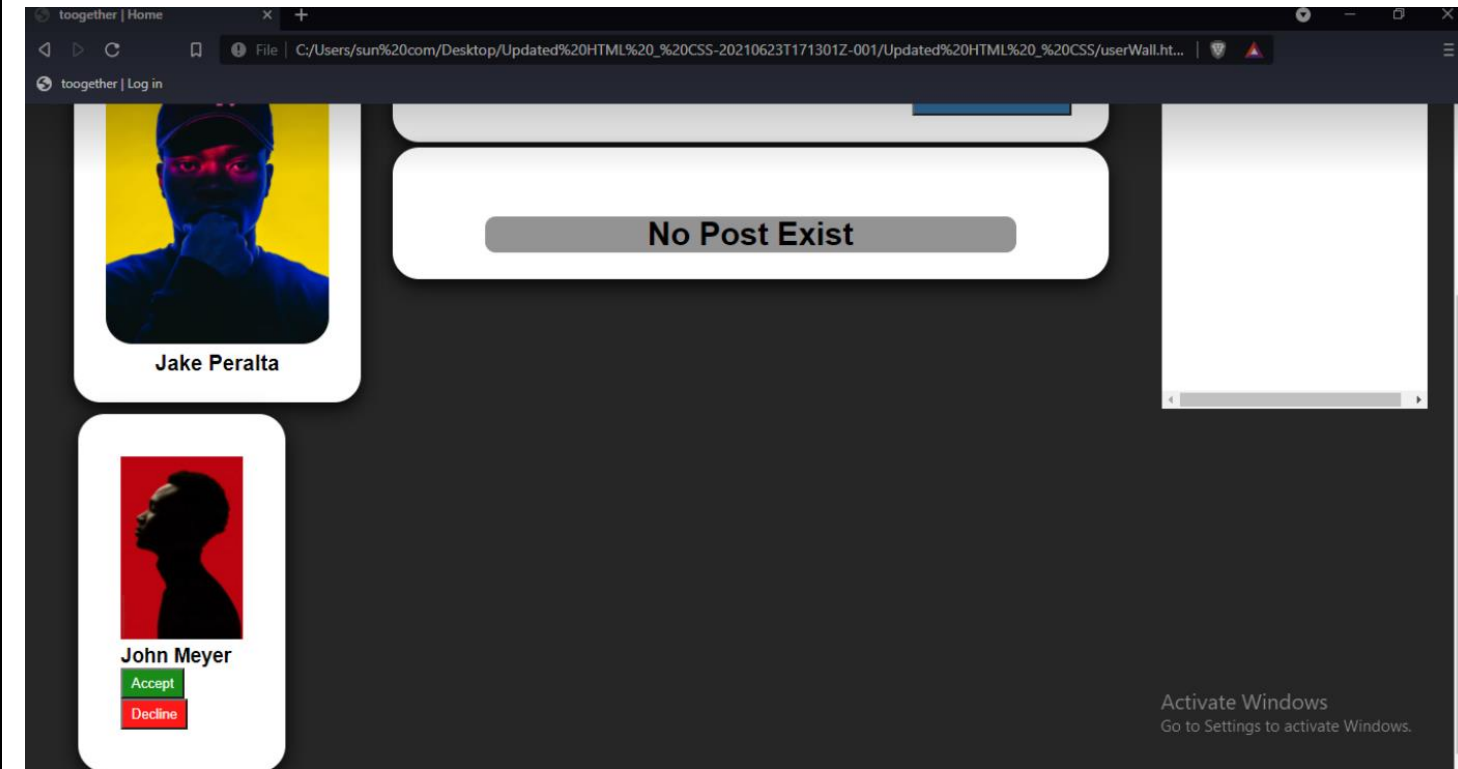

- Now in this screenshot, we will access the second account. We input Jake Peralta's email and password as shown above.

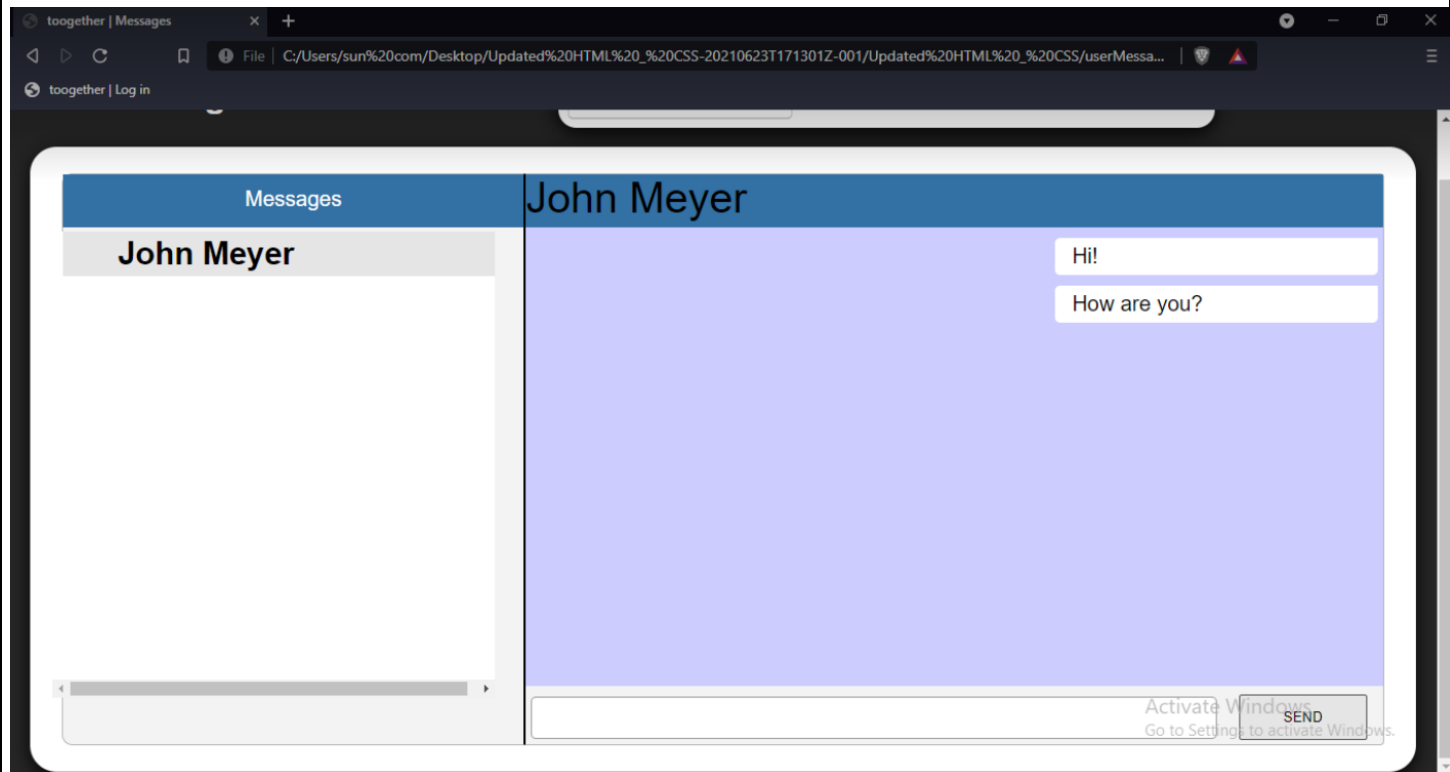

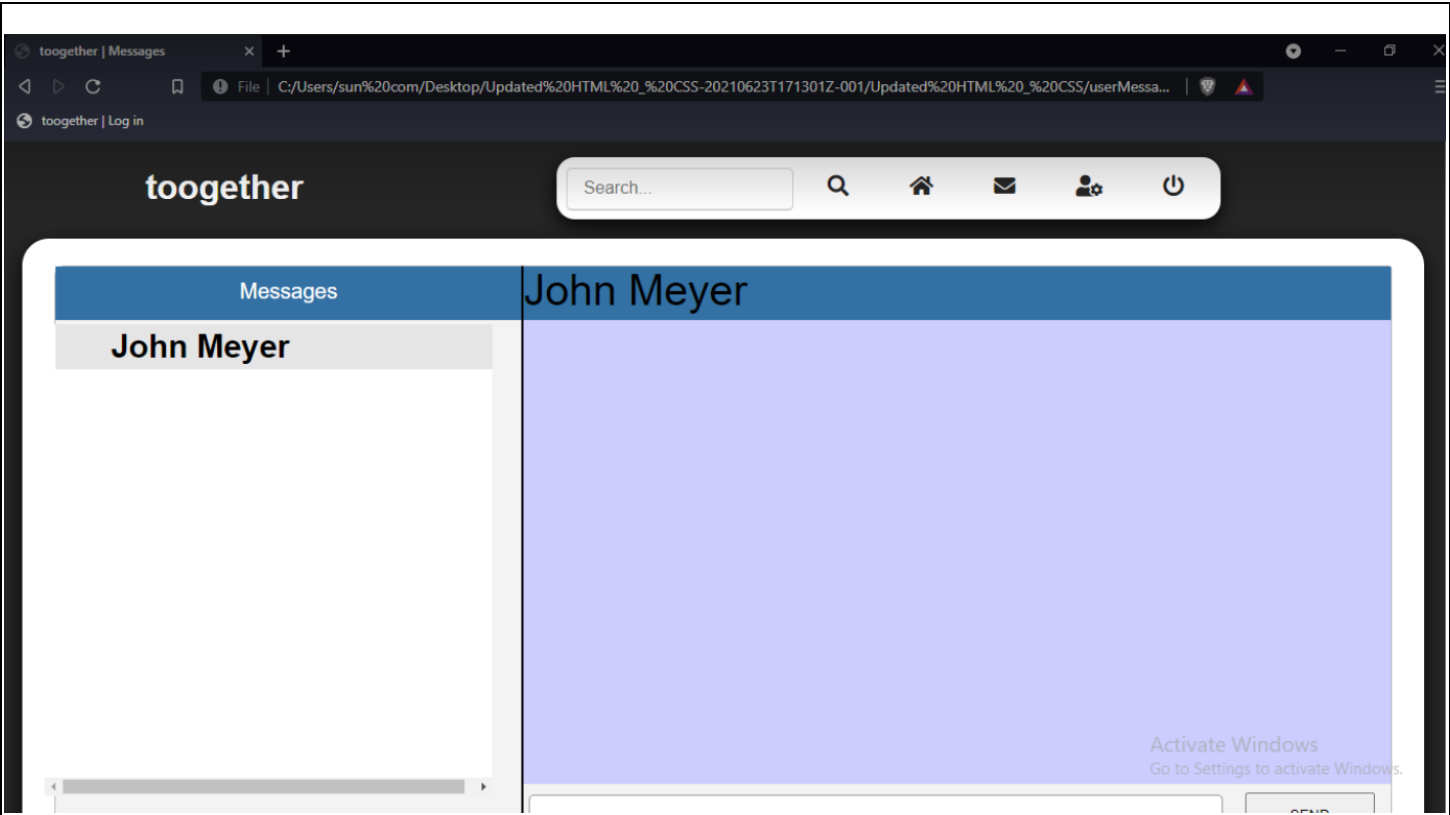

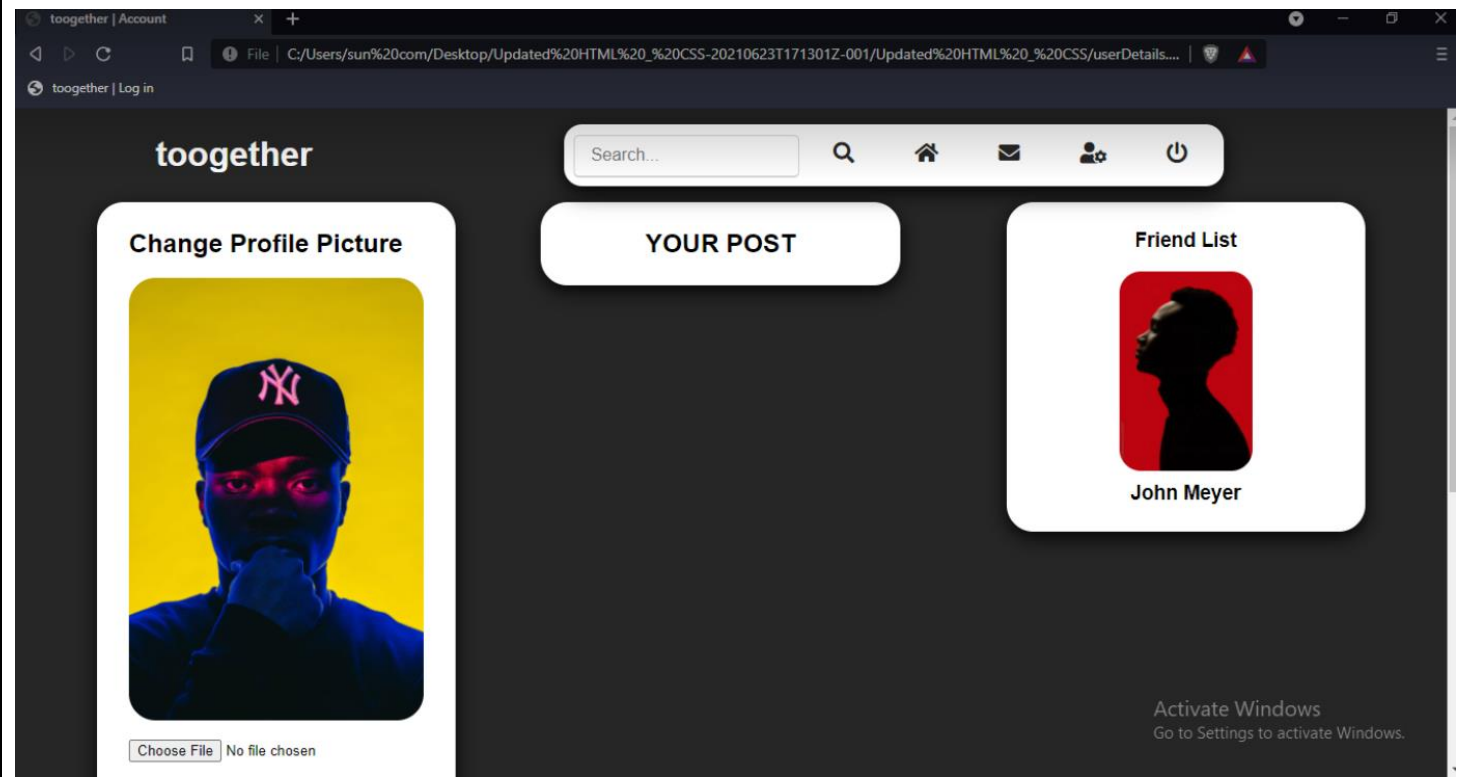

- As what the previous screenshot had shown, John Meyer sent a friend request to Jake Peralta. So it appears to Jake Peralta's My Notification as shown.

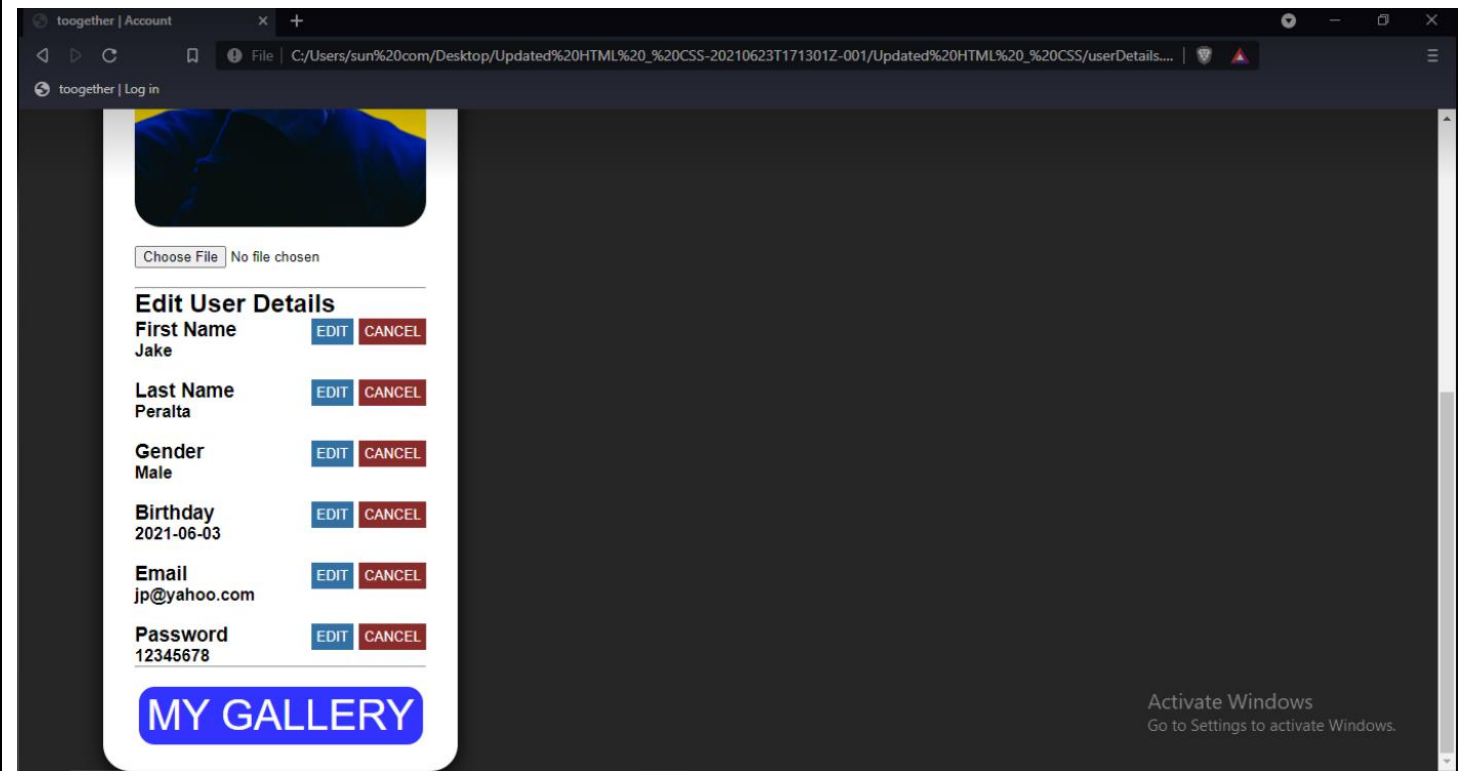

- Upon clicking the notification, it will appear below Jake Peralta's profile picture. As shown, two buttons are present, the Accept and Decline button.

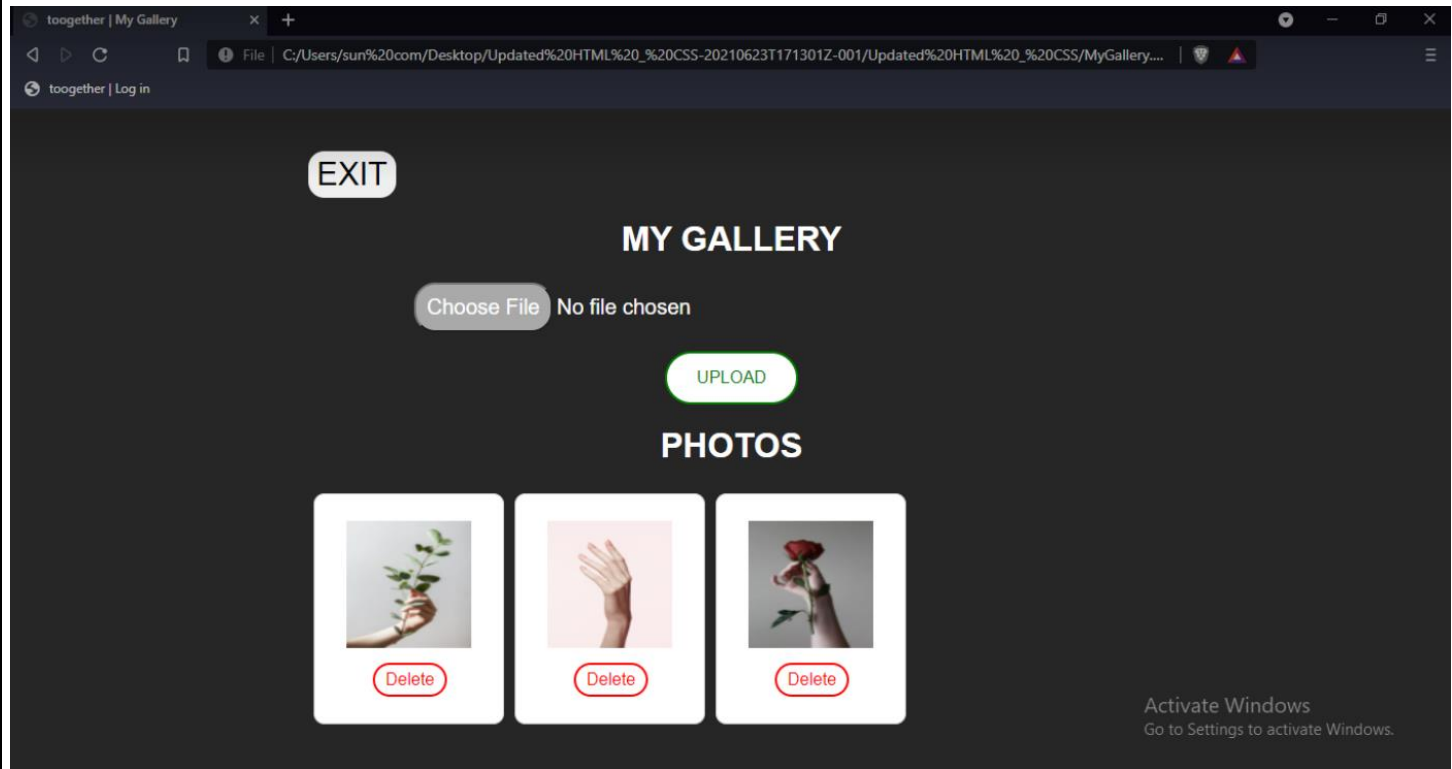

- together site has its feature wherein user can send message to another user. Upon clicking the message (envelop icon), this interface will appear. User can type text and it will be sent as he clicks the SEND button.

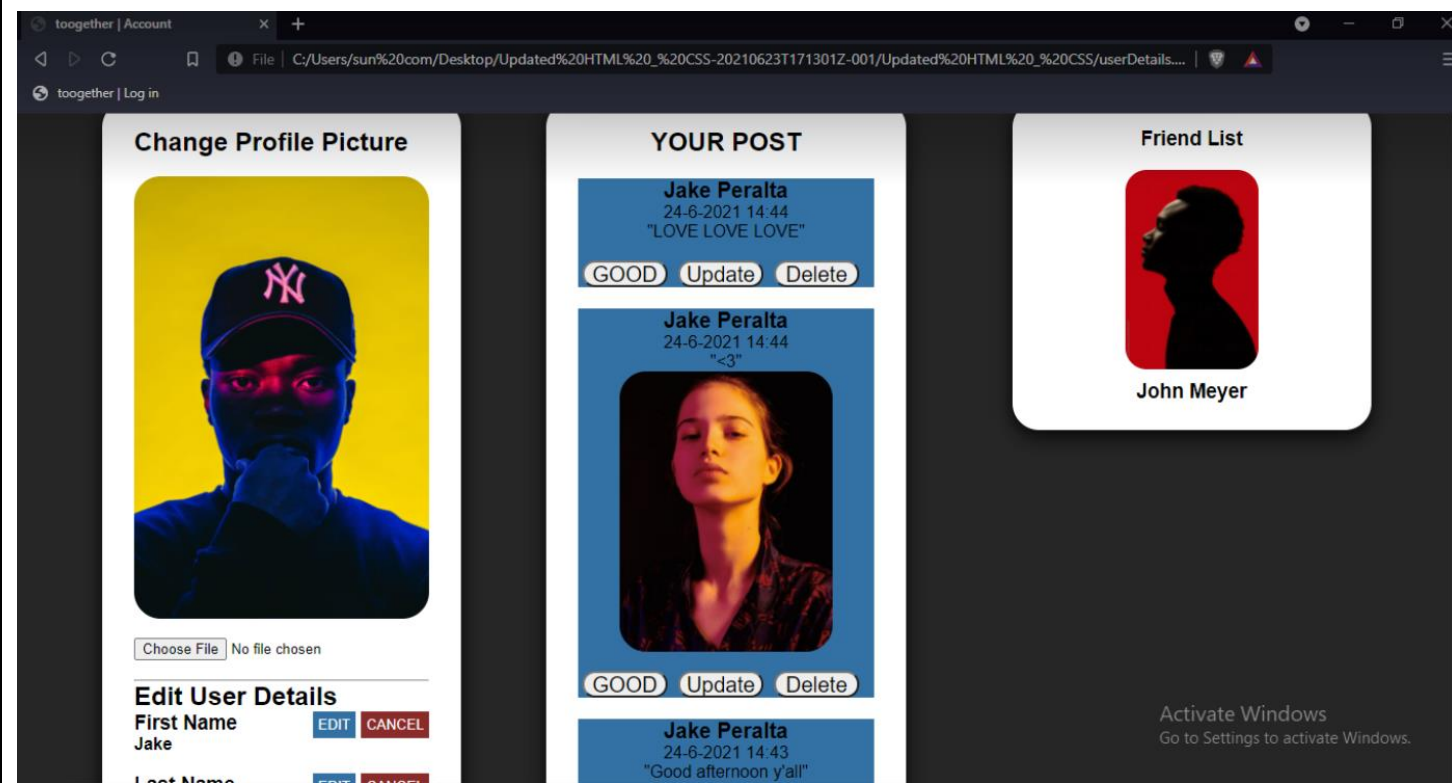

- Since Jake Peralta accepts the friend request of John Meyer, when he clicks the account setting, John Meyer’s profile will be seen on the friend list.

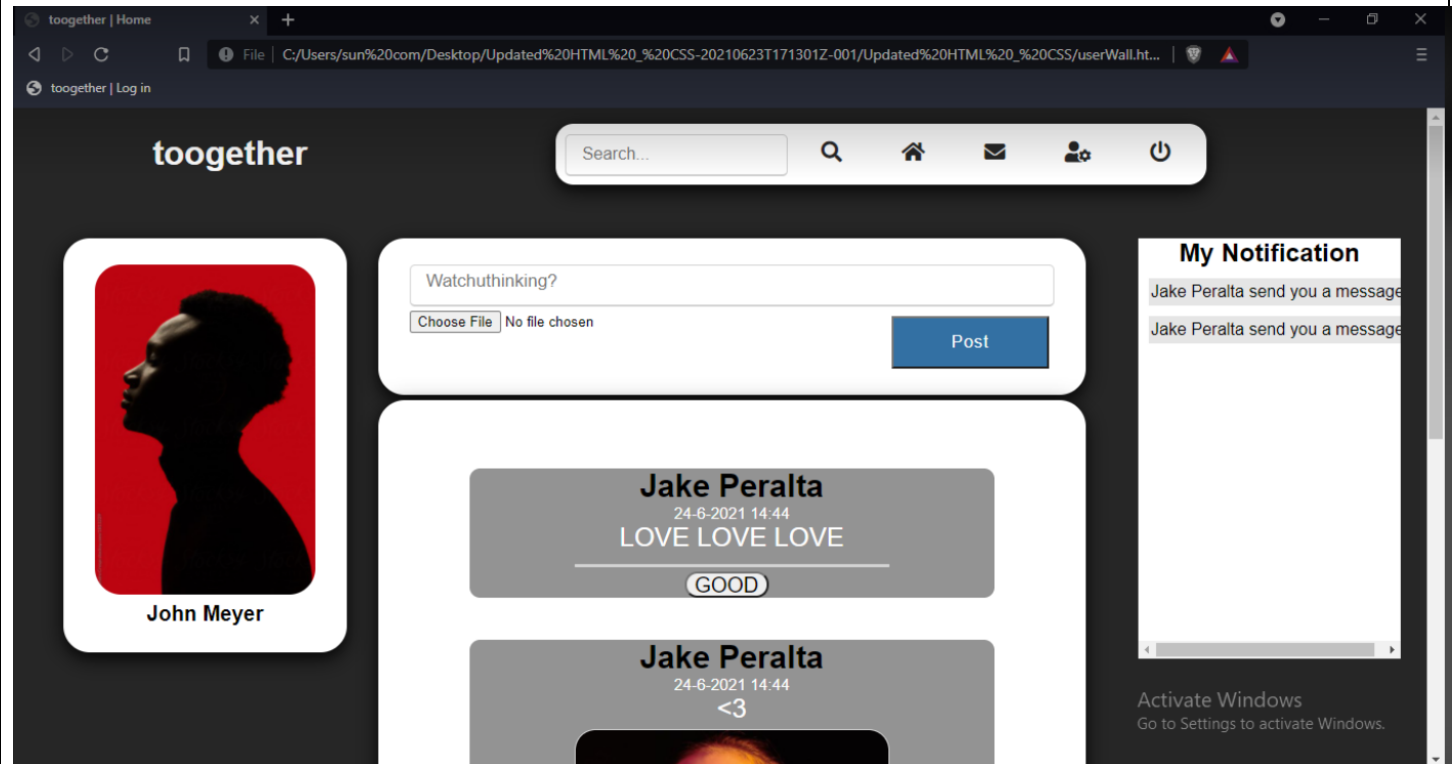

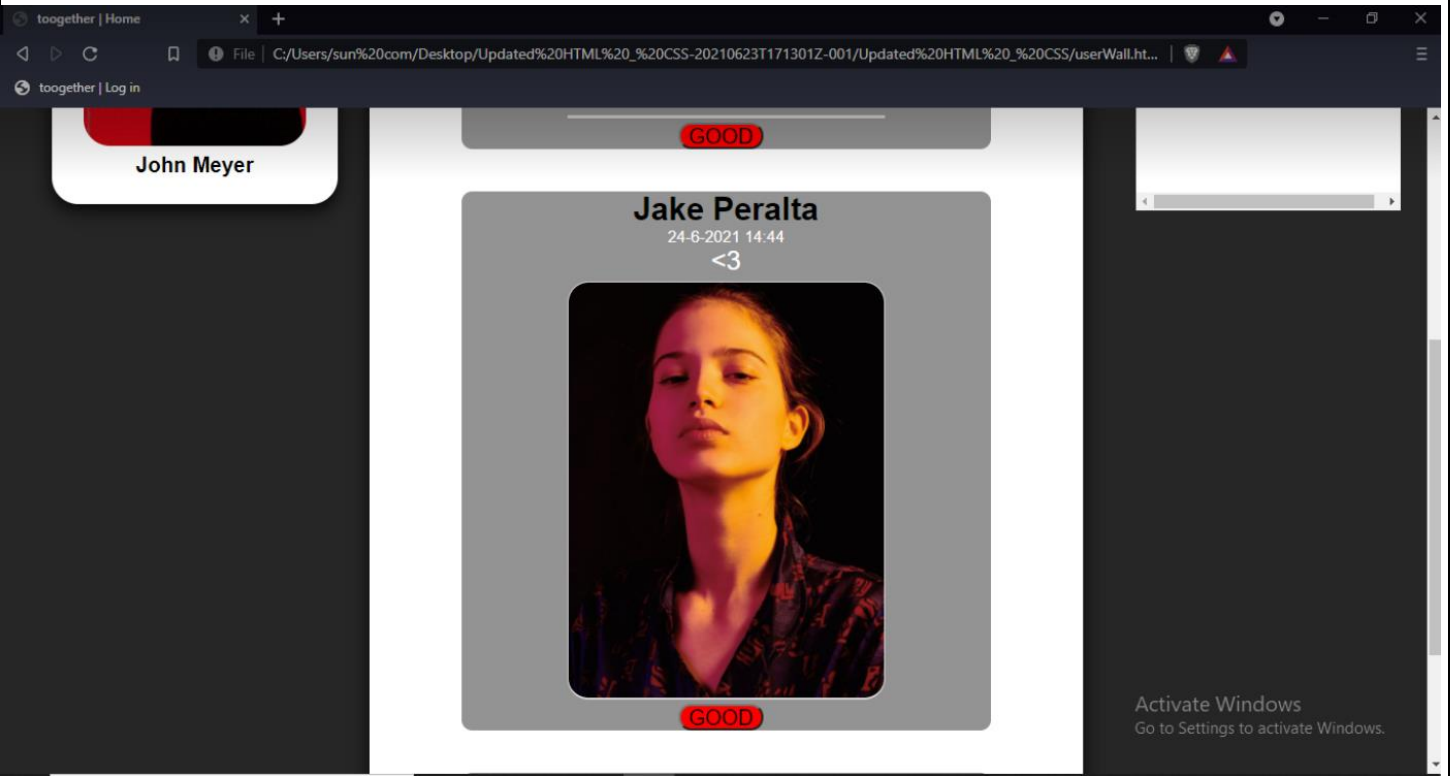

- The two screenshots above shows Jake Peralta’s pictures to be uploaded to his gallery.

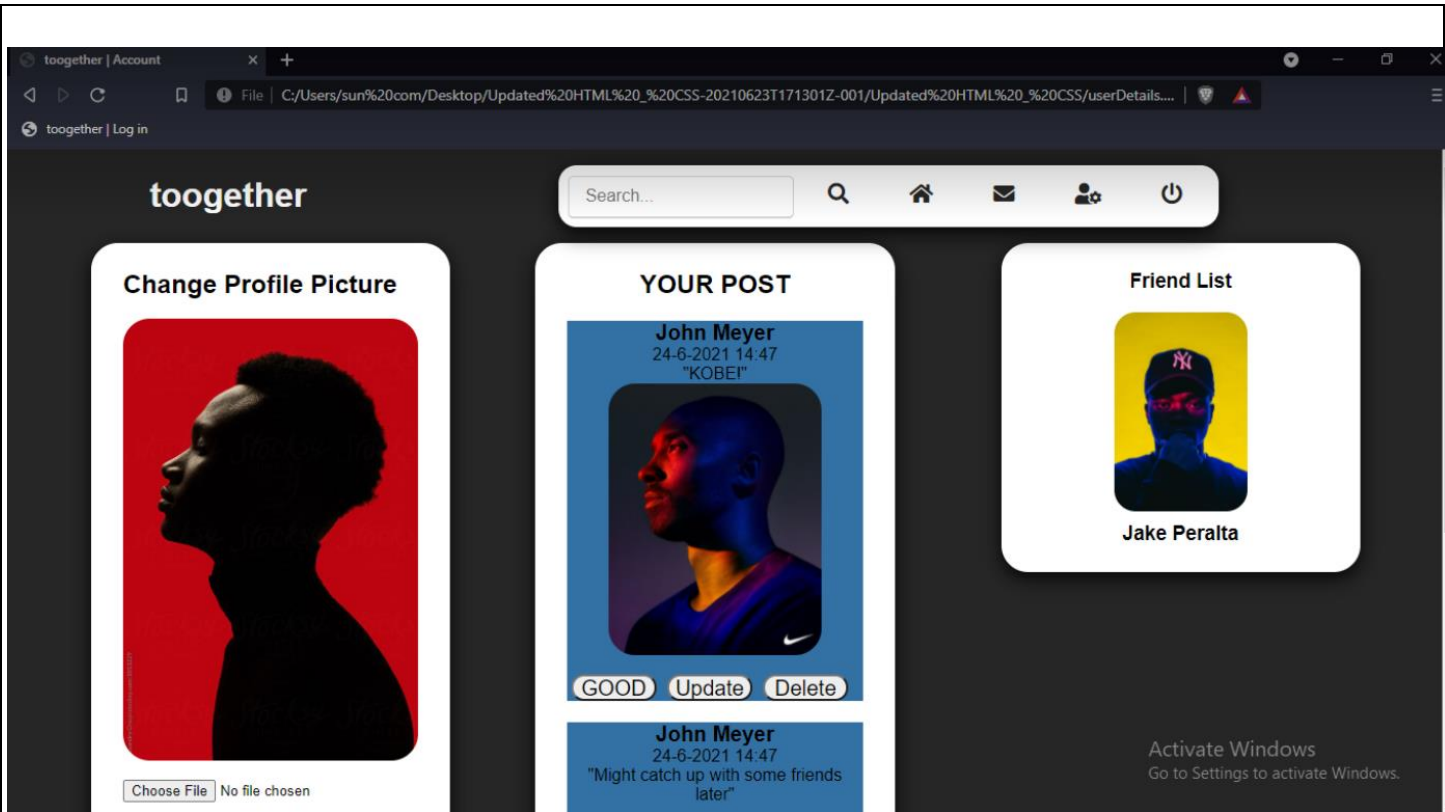

- User can see all of his own posts from the latest to the oldest. (This view is on the Account Settings and Jake Peralta’s account)

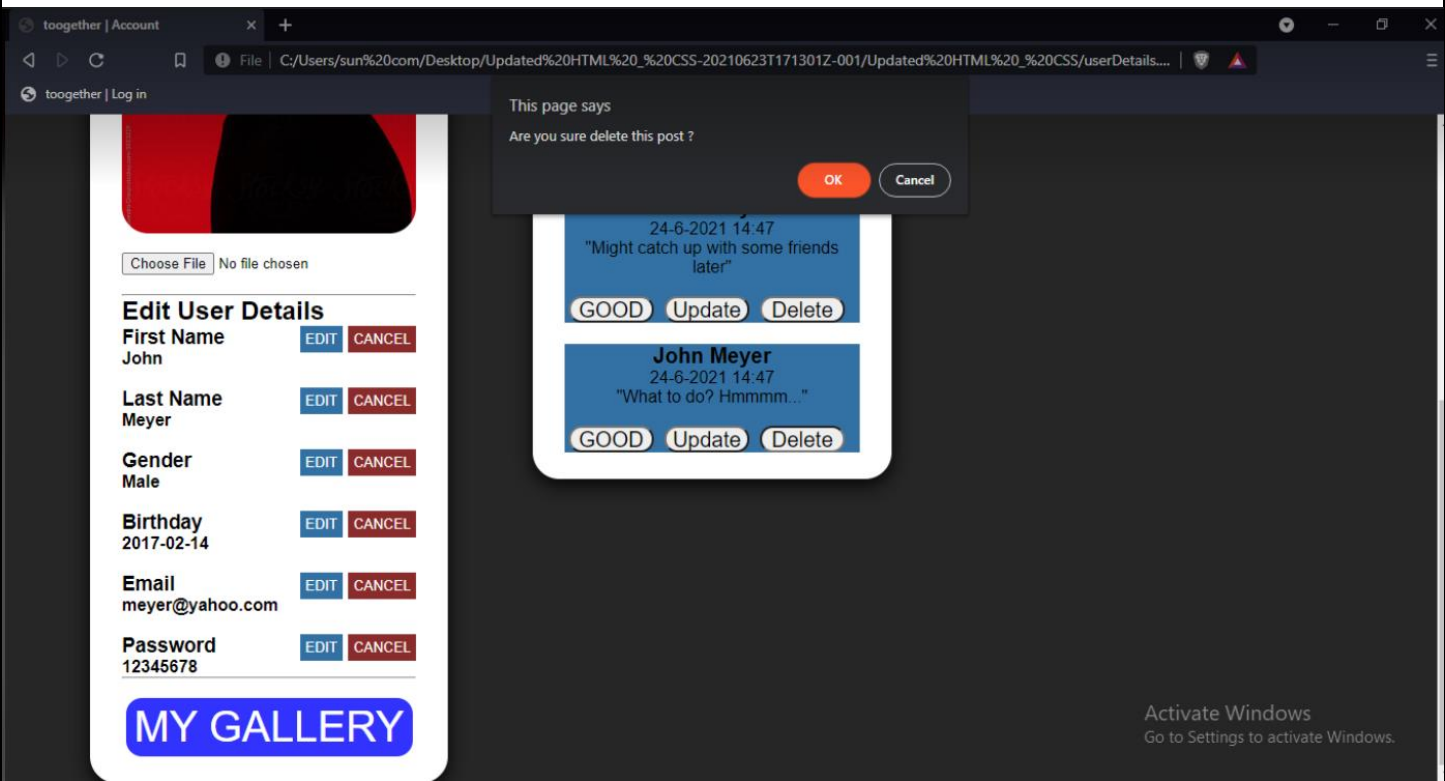

- He can also see his friend's post together with his own post. It is sorted from the most recent to the oldest.

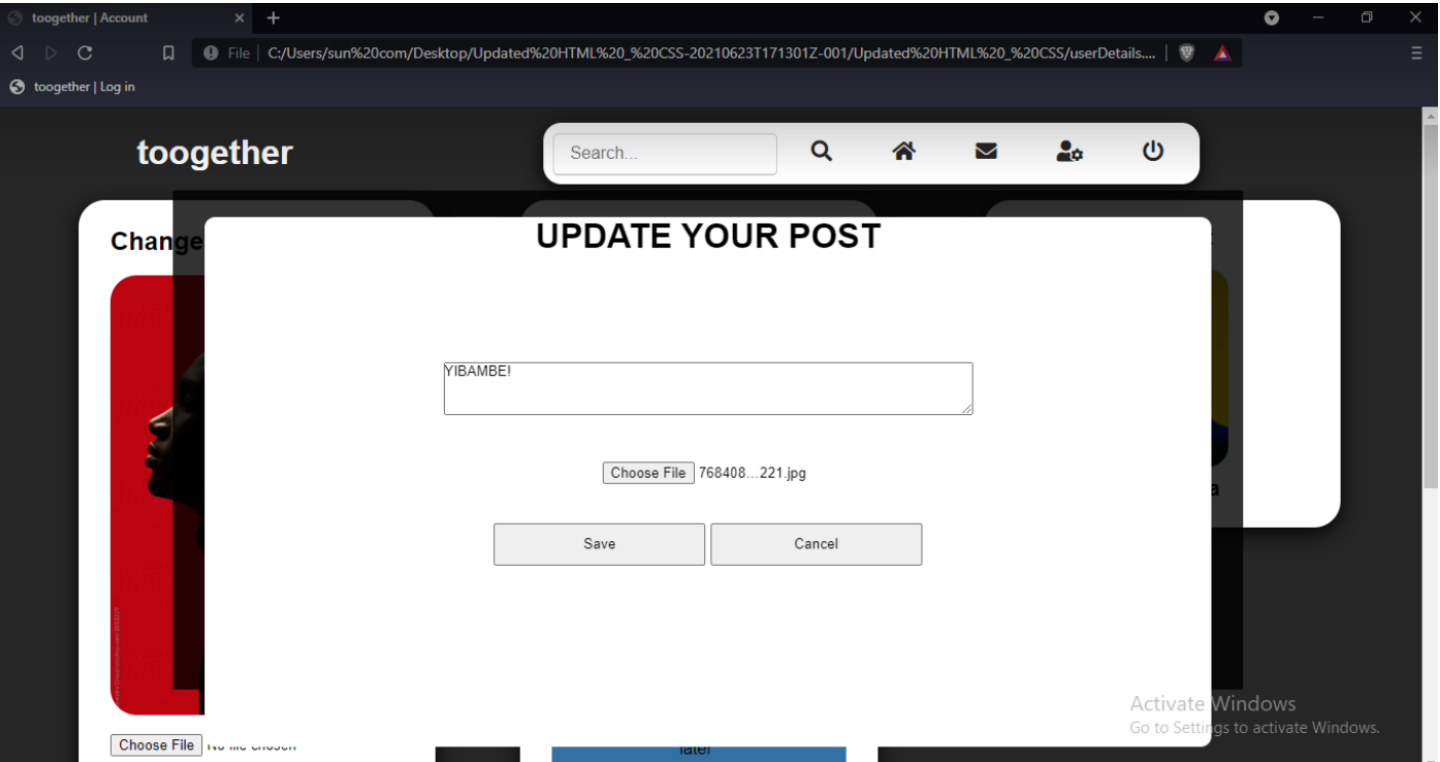

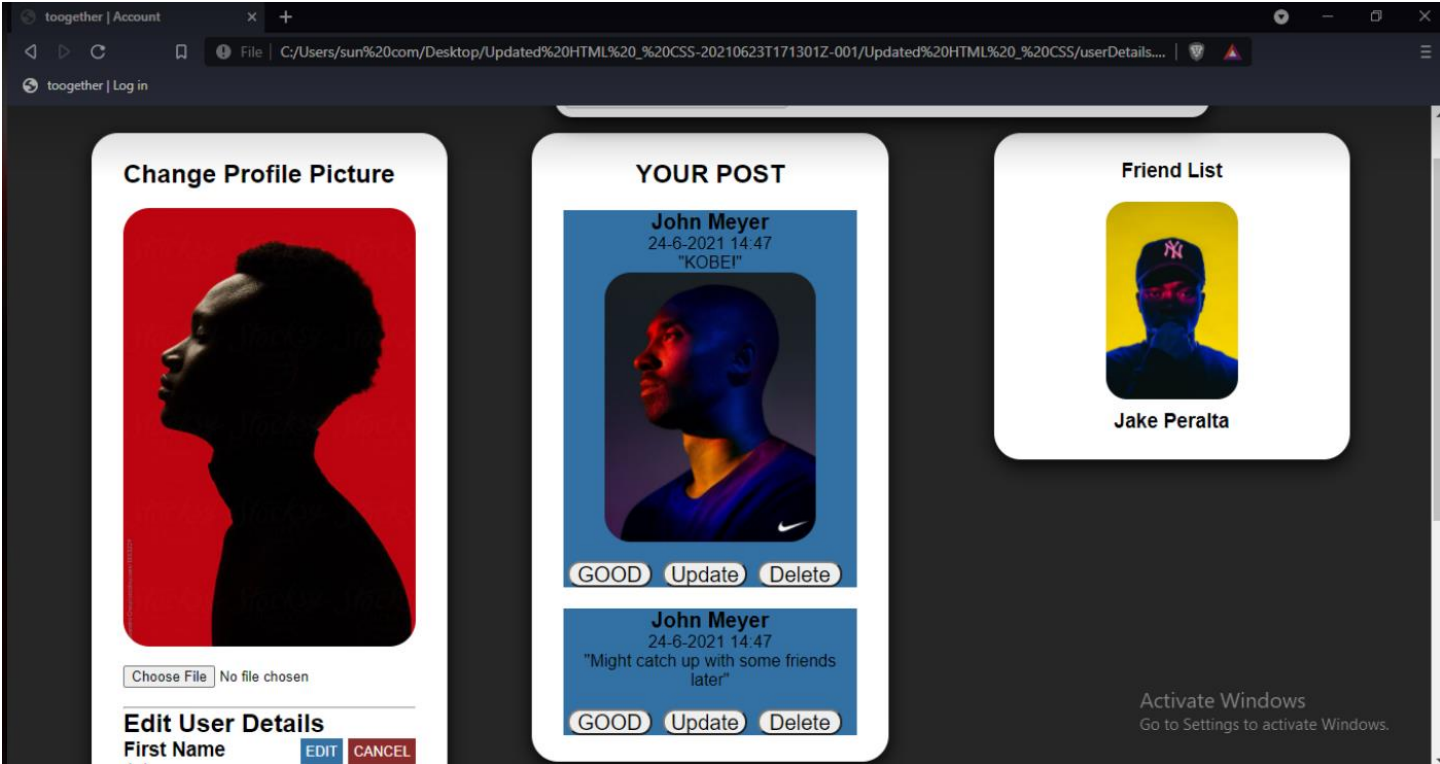

- User can react on his friend's post by clicking the GOOD button.

- User can see all of his own posts from the latest to the oldest. (This view is on the Account Settings and John Meyer’s account)

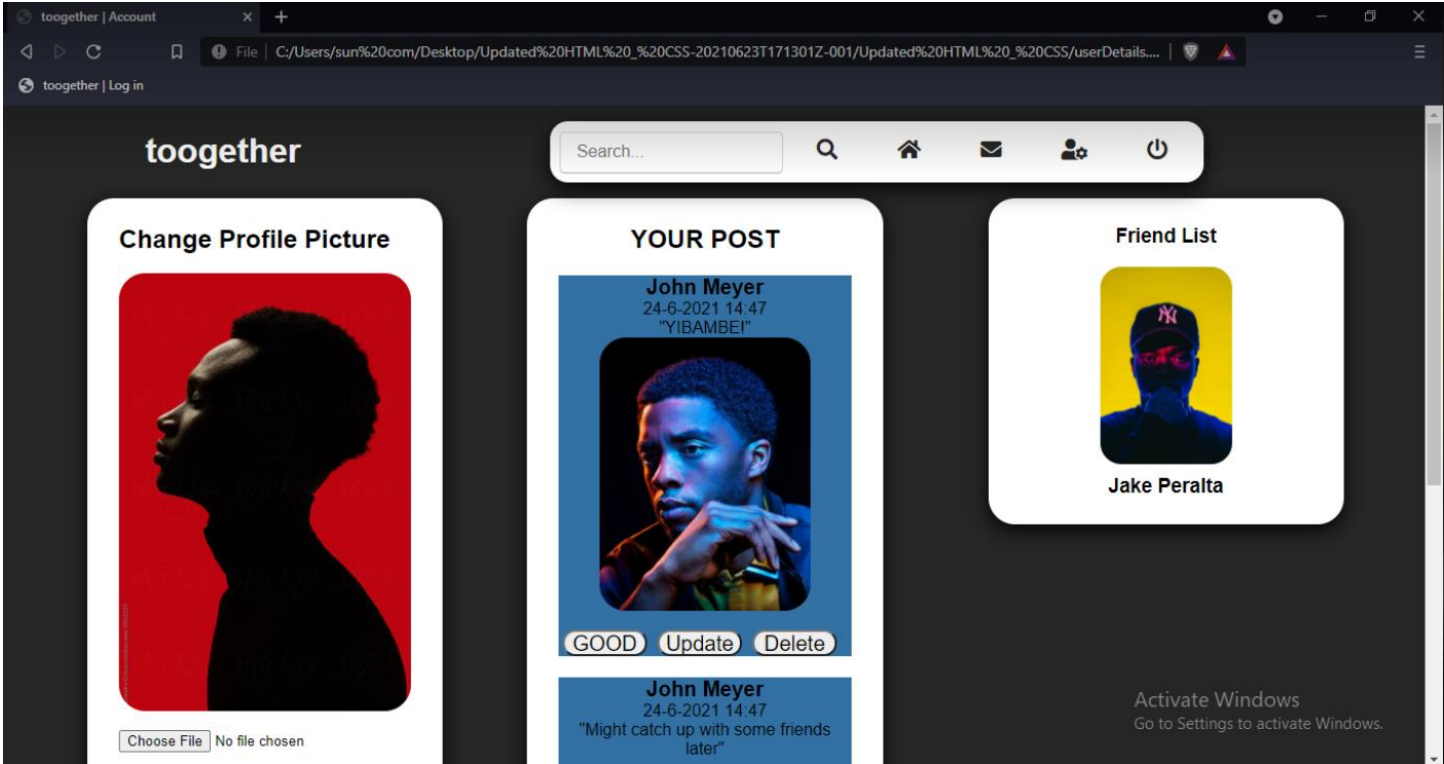

- User can also react on his post, as well as he can delete and update each post. When he decided to delete a certain post, confirm will appear at the upper part of the screen. And when he cliked OK, the post will be deleted.

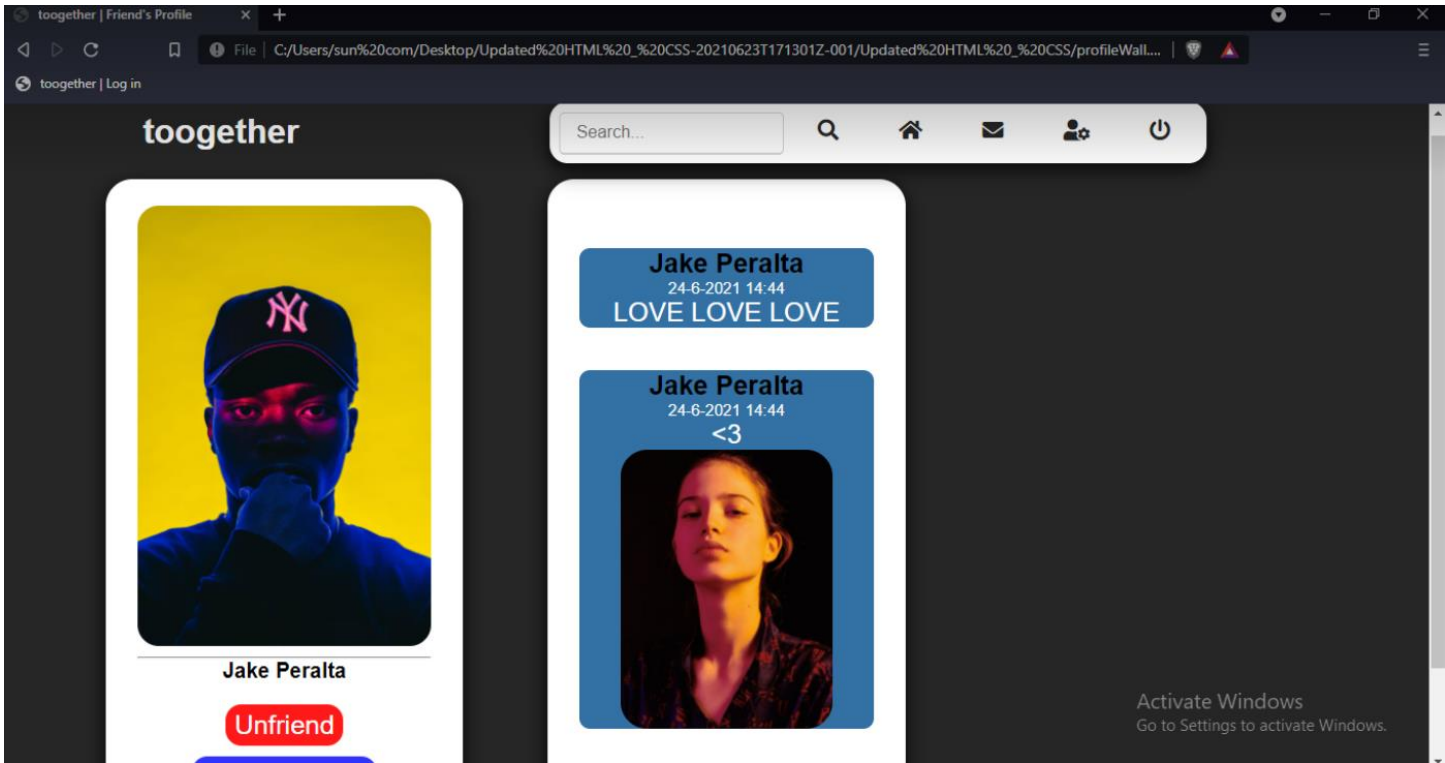

- User can update his own post by simply clicking the UPDATE button. In the screenshot given, user may change the uploaded picture by another picture and save it.

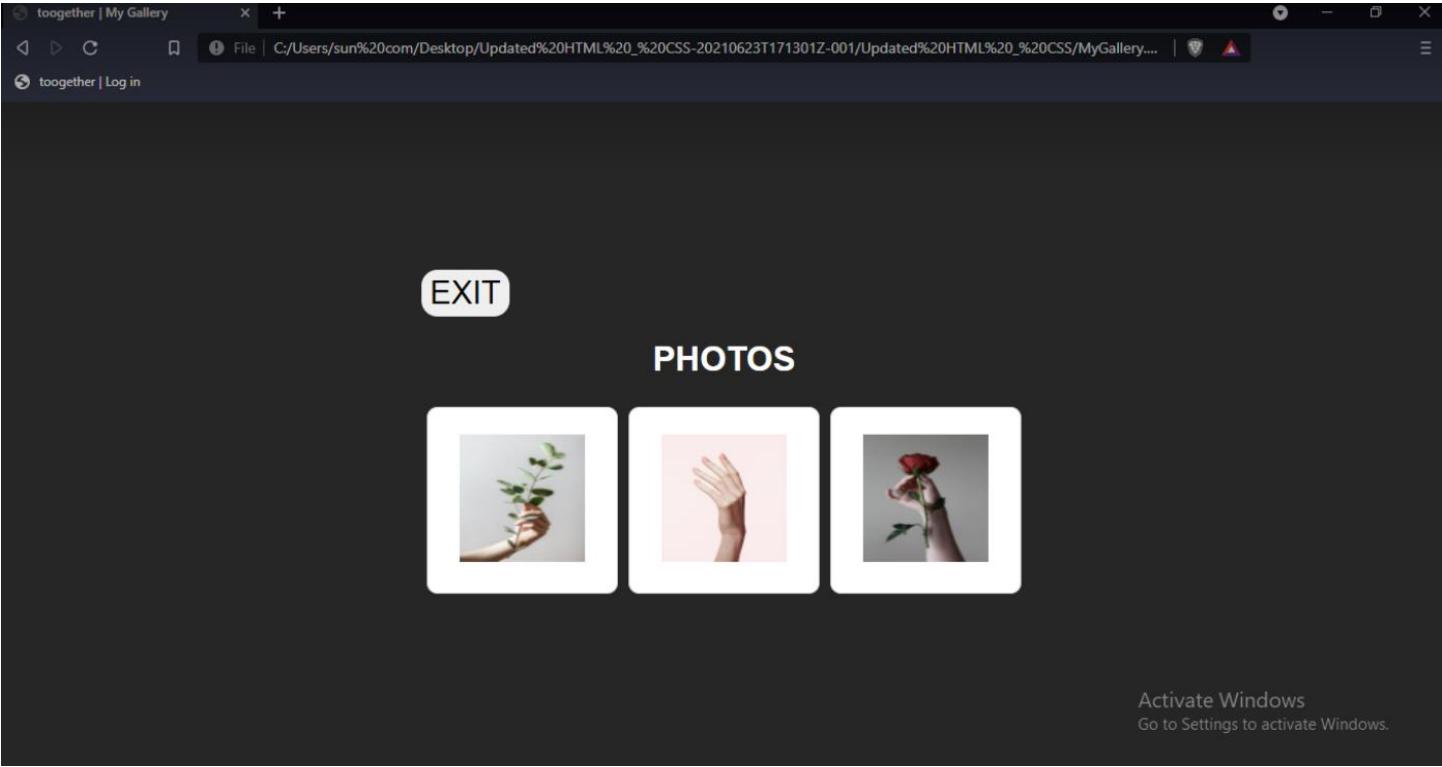

- From Jake Peralta’s account, he can view John Meyer’s posts and profile.

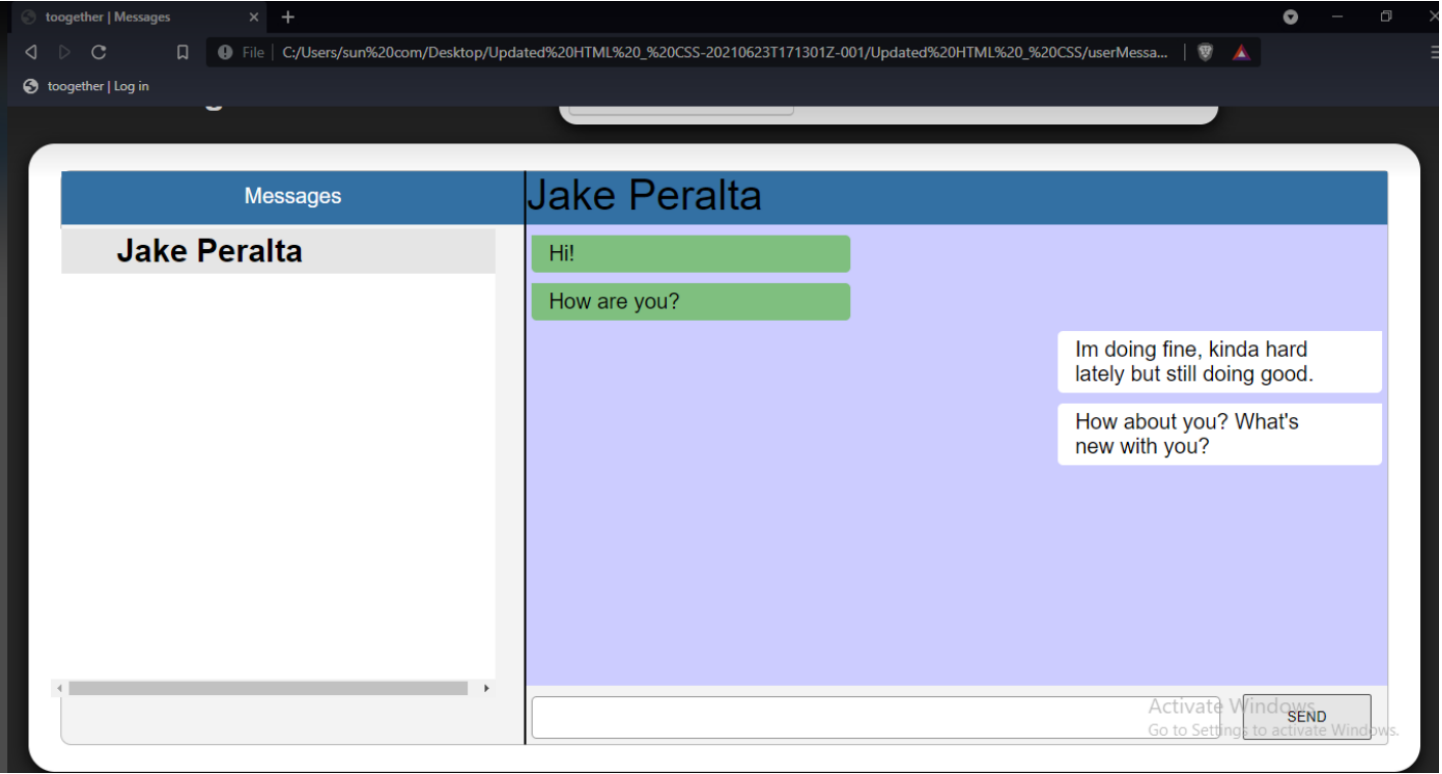

- As seen here, John Meyer can view his friend’s post on his profile.

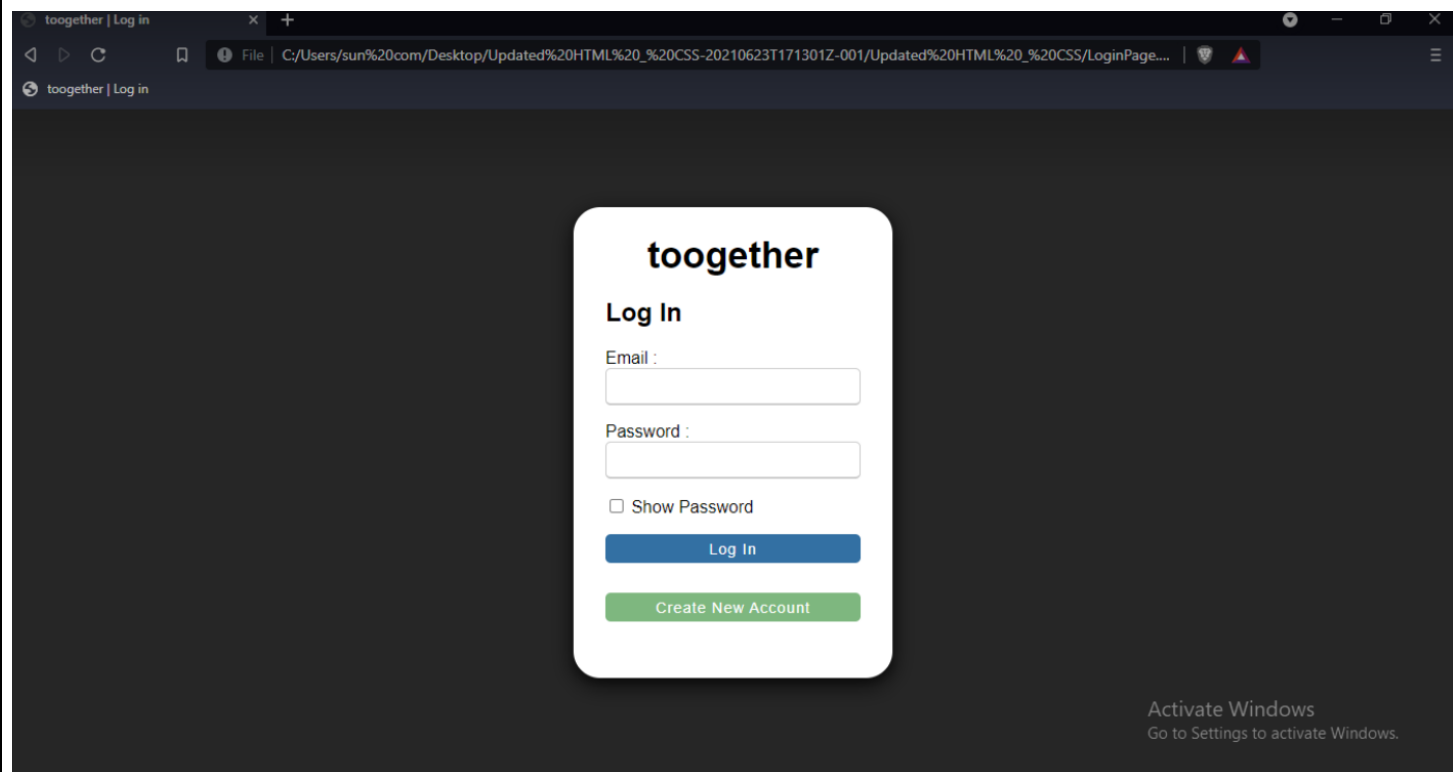

- Here, John Meyer can view Jake Peralta’s gallery.

- In this screenshot, we can see that John Meyer received the message sent by Jake Peralta. He can also reply and send messages.

- When the user clicks the log out button (the one that looks like power button), it will direct on the Log In page of the together site.
